premium

**PREMIUM KOLEKCIJA PRUŽA
POSEBAN I PRIRODAN IZGLED KUPATILU.**

Ormarići iz Premium kolekcije izrađeni su od medijapana farbanog najkvalitetnijim bojama u raznim nijansama ili iverice koja je oplemenjena melaminskom folijom u koju je utisnuta tekstura drveta. Iverica je presvučena zaštitnim slojem, a svaki deo kantovan je sa svih strana ABS ili melaminskom trakom što sve obezbeđuje potpunu vlagootpornost i paronepropustljivost ovih ormarića.

Svi PREMIUM ormarići sadrže savremeni *SLOWMOTION* mehanizam otvaranja i zatvaranja vrata i fioka, što je još jedan detalj koji Roper ormariće izdvaja na tržištu.

Lampe koje koristimo zadovoljavaju IP44 standard (vlagootpornosti), što omogućava bezbedno korišćenje u kupatilima. Određeni modeli poseduju LED rasvetu, koju odlikuje velika ekonomičnost uz estetsku notu koju poseduju.

A close-up photograph of a wooden cabinet door with a silver handle. The wood has a natural, light-colored grain. The handle is a simple, horizontal bar. The cabinet is part of a larger unit, with a white countertop visible at the top.

PREMIUM COLLECTION OFFERS A SPECIAL AND NATURAL LOOK OF THE BATHROOM.

Cabinets from the Premium collection are made from top quality MDF painted in various shades of colors or plywood that is enriched with a melamine resin embedding wood texture. Particleboard has a protective layer, and each piece has ABS or melamine edging tape on all sides. It all provides to all cabinets complete resistance to humidity and steam.

All cabinets from Premium collection includes modern *SLOWMOTION* mechanism of opening and closing doors and drawers, which is another detail that Roper cabinets separates from others on the market.

We use lamps that satisfy the IP44 standard (humidity resistance), allowing safe use in bathrooms. Certain models have LED lighting, which is characterized by high efficiency and aesthetics.

classic

Roper klasik ormarići su izrađeni od MDF-a poznatih evropskih proizvođača (KAINDL i HALLEIN) u najvišoj klasi kvaliteta.

U proizvodnji koristimo sirovi i oplemenjeni medijapan sa melaminskim folijama visoke gramaže a svaki komad se kantuje sa sve četiri strane melaminskom ili abs trakom. Obrada se vrši na najsavremenijim CNC mašinama sa velikom preciznošću i kvalitetom izrade. Završna obrada MDF-a se radi izolantom za MDF a zatim polieterskom podlogom koja se nanosi u više slojeva i završno farba poliuretanskom bojom visokog sjaja čime se u kombinaciji ovih boja postiže plastifikacija MDF-a koja mu obezbeđuje dugotrajnost i otpornost.

Elementi se proizvode u uobičajenim standardnim dimenzijama i pružaju neograničenu mogućnost kombinovanja u zavisnosti od prostora za koji su namenjeni i želja kupca.

Svi proizvodi su projektovani po svetskim standardima kvaliteta i veoma su praktični i funkcionalni.

The image shows a close-up of white, glossy Roper Classic cabinets. The cabinets have a clean, minimalist design with silver-colored horizontal handles. The text is overlaid on the left side of the image, providing information about the materials and manufacturing process of the cabinets.

Roper Classic cabinets are made of MDF from well-known manufacturers KAINDL and HALEIN in the highest class.

We use raw and refined MDF with melamine foil of high quality and each piece is glued on all four sides with melamine or ABS tape. The processing is done on modern CNC machines with high precision and production quality. Finishing MDF is done with isolator for MDF. Then the polyester substrate is applied in several layers and then painted high-gloss polyurethane. This allows the combination of these colors achieved by laminating MDF that it provides durability and strength.

The elements are standard sizes and offer endless opportunities of combining depending of space for which are intended and buyers wishes

All the products are designed by Swedish standard quality and they are very practical and functional.
